DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The house built by members of the Angell family and now known as the Farnum House is a two-story frame house, with gable roof set parallel to Putnam Pike (U.S. Route 44). Of center chimney plan, the rectangular structure is situated alone on a large open lot, but there are still remaining foundations of a small carriage house and outbuildings. The front facade is a five-bay composition, with the entrance slightly off center to the right. Evidence in the cellar indicates that the house originally consisted of three bays and the deed history bears this out. Records show that the house was enlarged about 1795. It was evidently brought up to date at the same time and most of the existing detailing is Federal in character. The entrance has three quarter length sidelights and a segmental fanlight, set with radiating louvers on the exterior, framing a six raised panel door. The side and fanlights are Federal with a three-quarter round molding, with molded caps at the transom bar level and at the middle of the fanlight. The first floor portion of the front facade has two windows to the left of the entrance (with later sash) and a large projecting semi-octagonal bay window to the right (probably a 20th century addition). The upper floor has five windows, in line with those below at left and centered above the entrance and bay. The upper windows are framed into the molding of the eaves cornice. All window frames are flat, with no additional trim. All walls are covered with weather boards 4 inches to the weather, with equal spacing.

The gable end elevations have not been altered, with five windows (later sash) in the northwest end, 1/2/2, and four windows and a door in the southeast end. The rear elevation, however, has had a door set into the second floor level, replacing a window, and a door and enclosed porch added to first floor. The foundation is fieldstone set in lime mortar and faced with dressed granite, and the roof is modern asphalt shingles over early wood shingles. Corner boards are flat, with no bead, and the continuous sill board has a bevelled top edge.

The interior of the house has been changed, but enough remains to permit an accurate restoration. The first floor plan is dominated by the massive brick center chimney and enclosed, curved stairway. The plan is a five-room layout with three fireplaces serving the three main rooms. The rear half of the house has a large central room flanked by two smaller rooms with vertical plank walls as dividers. Beaded corner posts remain exposed but much of the baseboard and chair rails have been replaced. All mantels, three on each floor, have been removed, but one original remains in storage. It is of a typical one-story Federal form, and all evidence indicates that the other mantels were of this same one-story type. Two later doors have been added to the small rear rooms on the first floor. Three of the remaining doors are original, but most are late 19th century. Except for the bay window, all window trim is original, but sash is 2/2. Floors, plaster walls and ceilings, except again for the room with the bay window, are original, as is the stairway, but the rail is later.

While the house has been altered, enough of the original fabric remains to permit an accurate restoration project.

STATEMENT OF SIGNIFICANCE

The deed history indicates that this house was built about 1765 by either Stephen Angell or his son Daniel. Stephen deeded "forty acres of land with a new house thereone standing" to Daniel in consideration of the love, goodwill, and naturall affection I have (for him)" in 1767.

The Angells were descended from Thomas Angell who came as an apprentice with Roger Williams from England in 1631. Angell thereafter accompanied Williams when he was banished from the Massachusetts Bay Colony in 1636, to Seekonk and Rhode Island; and he was one of the original signers of the compact drawn up on August 20th, 1637 to form the town fellowship of Providence.

Stephen was Thomas Angell's great-grandson. He served in a number of civic capacities in Johnston including as a member of the Town Council.

Daniel gave half of the farm, including the dwelling house and other buildings, to his son Olney in 1795. Olney promptly built an addition to the house, remodelled the front door to its present federal appearance with wooden fan and sidelights, and opened the house as a tavern.

The Angell house is significant for its role in the history of the town of Johnston, as a farm house, and as one of the town's taverns. It is also significant, for its typically colonial visual quality in an increasingly modernized environment and for the information it yields about our early building practices. Steady erosion of our early architecture means that every surviving early structure is valuable today. Johnston particularly has been subject to heavy development in the twentieth century and this house is one of the town's few remaining landmarks that date back to pre-Revolutionary times. The town acquired the house in the 1940's and has recently committed itself to restoring it as a Bicentennial project.

*The doorway was changed probably circa 1815-20.

Deed research indicates that this house was built about 1765 by Stephen Angell, who deeded "forty acres of land with a new house thereone standing" to his son Daniel "in consideration of the love, goodwill, and natural affection I have (for him)" in 1767. Daniel apparently sold the house soon afterward.

The Angell family in Johnston descended from Thomas Angell who came as an apprentice with Roger Williams from England in 1631. Angell thereafter accompanied Williams when he was banished from the Massachusetts Bay Colony in 1636, to Seekonk and Rhode Island; and he was one of the original signers of the compact drawn up on August 20th, 1637 to form the town fellowship of Providence.

Stephen was Thomas Angell's great-grandson. He served in a number of civic capacities in Johnston including as a member of the Town Council.

The Angell house is significant as one of the early homes of the ubiquitous and prolific Angell family, who were among the first settlers in Johnston. It is also important for its typically colonial visual quality in an increasingly modernized environment and for the information it yields about our early building practices. Steady erosion of our early architecture means that every surviving early structure is valuable today. Johnston particularly has been subject to heavy development in the twentieth century and this house is one of the town's few remaining landmarks that date back to pre-Revolutionary times. The town acquired the house in the 1940's and has recently committed itself to restoring it as a Bicentennial project.
